

## Sewage cleaning

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values.

Sewage cleaning is one of REYM's specialties. Whether it's cleaning or unblocking sewers or emptying septic tanks, REYM is happy to solve all common sewer problems for you.

### **Sewer inspection and recommendation**

Our sewer inspection truck is equipped with advanced measuring and video equipment, with which we can map the situation underground for you. Swivel head cameras, which can be used in sewer systems from 100 mm, provide a clear picture of the sewer situation. You will receive the results of the camera inspection digital, together with our recommendations.

### **Tailor-made solution**

With modern equipment and qualified staff, we can clean sewers of all shapes and sizes for you. Whether it's companies, government agencies, housing corporations or water boards, we make a tailor-made solution.

### **Good equipment is half the battle**

The Eco-Vac gully vacuum removes the contamination from the sewer in a short period of time. It is equipped with a vacuum pump with a capacity of 2400 m<sup>3</sup> per hour. In order to be able to load as much sewage sludge as possible, an extra valve has been mounted in the rear cover, so that the water can be discharged in the meantime.

The high-pressure sewer truck has a tank capacity of 13 m<sup>3</sup> and a hydraulically driven swivelling hose reel with a capacity for 120 metres of high-pressure hose. By using a jet piston-filling system, the truck can be used efficiently, even without water or fire hydrants.

The Sewage Camera Truck distinguishes itself by its complete equipment. Three video monitors, a computer and a colour printer are installed in the operating and control room of the inspection vehicle.

The video cameras for sewer inspection can be used as sliding cameras or in combination with an electrically driven camera truck. And last but not least, the entire system complies with the ATEX 95 directive for use in hazardous areas.

#### Why REYM?

- Customer-oriented approach
- Network of branches throughout the country
- Qualified staff and modern equipment
- Quality, safety and the environment are paramount
- Complete package of cleaning services and 65 years of experience

If you would like more information, please contact one of the REYM branches in your region.
